Yohangel Andres Ramos Quiñones

Senior Fullstack Developer / Software Architect / Team Lead |
React.js, Next.js, Nest.js, IA, Cursor, Claude, BMAD, Postgres |
Driving Scalable Web Solutions | 9+ Years Experience

Venezuela

Extracto

I architect high-performance web solutions that blend technical excellence with business impact. With 8+ years leading frontend transformations for global brands, I specialize in React.js, Next.js, and Angular to build scalable applications that deliver measurable results.

Proven Expertise:

Frontend Optimization: 90+ Lighthouse scores for PWAs (Toyota Colombia: 70% ↓ form abandonment)

Full-Stack Efficiency: Automated workflows saving 60% manual effort (Okun's intranet)

SEO-Driven Development: 35% traffic growth via WordPress custom solutions

Technical Arsenal:

React.js | Next.js | Angular | Node.js | AWS | GraphQL | Agile Leadership | Technical Mentoring

Let's connect if you need:

A senior tech lead who bridges code and strategy

Scalable web apps with offline capabilities

Performance optimization at enterprise level

Open to contract roles & strategic projects.

Full-stack senior developer

agosto de 2025 - Present (1 año)

Remoto

Destiny

Full-stack Developer

octubre de 2024 - mayo de 2025 (8 meses)

Technologies: Next.js, Angular, AWS (Amplify, Lambda, DynamoDB), Node.js, PostgreSQL, Service Workers

Key Contributions:

Spearheaded the development of Toyota Colombia's Next.js-powered Progressive Web App (PWA), enabling offline functionality for event attendees, resulting in a 70% reduction in form abandonment during connectivity gaps.

Architected a modular component system for Toyota's website redesign, enabling seamless future integration with a headless CMS and reducing development time by 25% through reusable code.

Engineered a serverless admin dashboard using AWS Amplify and DynamoDB, allowing real-time updates to vehicle models/colors and automated build deployments, cutting deployment cycles by 40%.

Collaborated with cross-functional teams to optimize API performance, achieving 90+ Lighthouse scores for core web vitals.

Profesional independiente

Full Stack Web Developer

abril de 2024 - mayo de 2025 (1 año 2 meses)

Technologies: React, Next.js, Supabase, Node.js, PostgreSQL, Tailwind CSS, AWS

Key Projects:

Sienna Product Catalog: Developed a mobile-first virtual catalog using React and Supabase, streamlining product management for Instagram/WhatsApp marketing and boosting client leads by 40%.

Okun Corporate Intranet: Built a Next.js-based system with role-based permissions and automated XLSX reporting, reducing manual report generation time by 60%.

WordPress Custom Solutions: Delivered 10+ high-performance websites with custom themes, achieving 95+ SEO scores and <2s load times through optimized code and caching strategies.

Acid Tango

2 años 1 mes

Frontend Developer

marzo de 2022 - marzo de 2024 (2 años 1 mes)

Technologies: Next.js, Strapi, Salesforce OCAPI, Sass, Stitches

Key Contributions:

Revamped NaturesMenu.co.uk's meal-planning interface using Next.js, reducing user onboarding time by 30% through intuitive UX/UI design.

Integrated Salesforce OCAPI for real-time data synchronization, enhancing backend-frontend workflow efficiency by 50%.

Championed accessibility compliance across projects, ensuring WCAG 2.1 AA standards for 100K+ monthly users.

Collaborated on Libeen.com's responsive platform, leveraging Next.js and Sass to improve mobile conversion rates by 20%.

Frontend Developer

marzo de 2022 - marzo de 2024 (2 años 1 mes)

Ontop

Frontend Developer

octubre de 2021 - diciembre de 2021 (3 meses)

Technologies: React, Sass, Agile Methodologies

Key Contributions:

Enhanced the Ontop HR platform's UI by refining React components, reducing user-reported bugs by 35%.

Streamlined stakeholder communication to align frontend updates with business goals, accelerating feature delivery by 25%.

Dimática Software Development

Frontend developer/analyst

octubre de 2019 - febrero de 2021 (1 año 5 meses)

Technologies: Angular, GraphQL, Python/Flask, MongoDB

Key Contributions:

Migrated a legacy Excel-based workflow to a microservices-driven web platform, reducing manual data entry errors by 90%.

Designed Angular components integrated with GraphQL APIs, improving data fetch speeds by 45%.

Tacubaya Consulting

Frontend Developer

junio de 2019 - octubre de 2019 (5 meses)

Madrid, Madrid, España

Technologies: Angular 8, React, PHP, Bootstrap

Key Contributions:

Modernized 5+ enterprise applications with responsive Angular/React interfaces, increasing user engagement by 25%.

Reduced cross-browser compatibility issues by 60% through rigorous testing and CSS optimization.

Sngular

Frontend Developer

abril de 2019 - junio de 2019 (3 meses)

Oviedo, Asturias, España

Upgraded Angular 7 applications for 3 clients, improving runtime performance by 20% via code splitting and lazy loading.

Customized WordPress themes for 2 corporate websites, boosting organic traffic by 35% through SEO-driven development.

Krell Consulting & Training, S.L.
Javascript/Angular Developer
julio de 2018 - marzo de 2019 (9 meses)
Langreo, Asturias

Technologies: Angular 6, TypeScript, REST APIs

Key Contributions:

Developed a whitelabel Angular solution for Promocaixa, enabling rapid client customization and reducing deployment time by 50%.

Optimized API calls and local storage usage, slashing page load times by 40% for 10K+ daily users.

Autónomo
Web Developer
septiembre de 2017 - mayo de 2018 (9 meses)
Caracas, Venezuela

Technologies: WordPress, HTML/CSS, JavaScript, Angular

Key Projects:

Delivered 15+ WordPress sites for international clients, including Miami Aikikai's membership portal, increasing event sign-ups by 50%.

Built a custom Angular app for DINAMIQ, automating inventory tracking and reducing manual labor by 70%.

Organizame
Javascript Developer
noviembre de 2017 - diciembre de 2017 (2 meses)

- Led the migration of the Organizame web application (an online tool for organizing invoices, assets, and liabilities of companies) from AngularJS (initial version) to Angular 6.

Experience:

- Adapted AngularJS template to Angular 6 version, ensuring compatibility and seamless transition.
- Proposed and implemented a restructuring of the website's functionality, transitioning from a single-call approach with all data stored in \$scope to a more efficient method with REST API calls made dynamically as needed, and utilizing local storage/sessions for persistent data.

- Conducted testing and resolved issues to ensure the stability and functionality of the migrated application.

Fragata studios

Web Developer

julio de 2017 - agosto de 2017 (2 meses)

- Conducted website layout design for clients in Colombia and Mexico based on PSD designs, utilizing HTML/CSS/JavaScript and client-selected frameworks such as Bootstrap, Foundation, etc.

Example Developments:

- Layout design for Premex.
- Maintenance and bug resolution for Skymotion (Prestashop).
- Maintenance and bug resolution for a Colombian news website.
- Provided bug fixes and enhancements for various web applications built with Prestashop and WordPress.

Learnsity

Frontend Developer

febrero de 2017 - julio de 2017 (6 meses)

- Led the maintenance efforts for the frontend area of the Learnsity platform, focusing on bug resolution, development of new features, and code improvements.

Responsibilities included:

- Identifying and resolving bugs in the frontend codebase to ensure smooth operation of the platform.
- Developing new frontend features in accordance with project requirements and stakeholder feedback.
- Implementing code improvements and optimizations to enhance the performance and maintainability of the platform.
- Used HTML, CSS, and JavaScript to implement frontend solutions and enhancements.

PAMAX Outsourcing

Web Development Coordinator & Full-stack Developer

agosto de 2016 - marzo de 2017 (8 meses)

Caracas, Venezuela

- Coordinated and led a small development team in creating various types of web applications for a marketing agency.

- Utilized PHP, JavaScript, jQuery, and WordPress for web development projects.

Responsibilities included:

- Overseeing the development process from project inception to delivery, ensuring adherence to timelines and quality standards.
- Collaborating with stakeholders to gather requirements and define project scope.
- Leading the implementation of frontend and backend solutions, including database design, server-side scripting, and frontend development.
- Providing technical guidance and support to team members, fostering a collaborative and productive work environment.

LARS

Web Developer

noviembre de 2016 - diciembre de 2016 (2 meses)

- Developed and customized WordPress websites for clients in Colombia, including the creation and modification of templates.

Example Development:

- Raúl Grisales: Designed and created a WordPress template for a website previously built on the Wix platform, including layout design and customization.

Zuaru

Junior Web Developer / Development Assistant

mayo de 2016 - julio de 2016 (3 meses)

- Assisted in the development of web applications in Venezuela using PHP, HTML, and CSS, with a focus on responsive design.

Example Development:

- LVBP: Contributed to the development of an intranet for the Venezuelan Professional Baseball League.
